JIF WORLD COMPETITIONS JAPAN 2020

Being Jorkyball an Amateur Sport, the *Jorkyball International Federation* is well aware of the economic and organizational difficulties that every athlete may encounter to participate in an event in a place so far - *but at the same time so fascinating.*

We remind you that JIF supports the participation of each athlete in different ways:

1. As already for Rome 2017 and Quebec 2018, **we will give free visibility to all your Local Partners**, that is to say on the 3 fields with the logo of your local partners on the stickers (see piece-joint »Adhesives partenaires Quebec 2018», please), either on the Internet site and Social Networks. It is needed to send us the logo (high-definition) and the details of your Sponsors. Do not forget to give visibility to your Partners on your competition jerseys; and, if necessary, nothing against **naming your Team with the name of your Lead Partner**
2. **There are several funds that support Amateur Sport.** Subsidies at citizen, departamental, regional, national level depending on your Country and Territory. In particular, we must not forget that you will represent your City or Country in a Global Event. So, **JIF has prepared an Official Presentation of the JWC Japan 2020 : this Document will be shared with all players and Sports Clubs**, to look for the necessary funds for your travel expenses. Furthermore, we can give you **Official Certificates for your participation in World Tournaments**
3. **JIF is working right now with several airlines companies** for finding the best fares and the best conditions to fly to Japan and to reduce travel costs, especially for group departures
4. Recently, **the crowdfunding structure has been extended and strengthened.** A model for applying for online funds to achieve an objective, such as participating in a global sports event. JIF will support all these initiatives that will allow you to obtain funds to reduce your travel costs.

Finally, **we enclose you the map of the Fukuoka Subway** - a very big and modern city.

The Jorkyball Complex is 5 minutes away from the N7 subway stop; at the same time, the airport is easily reachable with the same metro.

It means that in Fukuoka you will not need to rent a car for your trips. In our opinion, it's an important saving of money.

Finally, the Japan 2020 Committee has advised us a neighborhood of the City or seek your accommodation (please check the plan); anyway, once confirmed the Event you will be able to contact the Committee for any question regarding hospitality.
